Experience

IT Corporate Support / Cybersecurity Intern

Great Wolf Lodge — Remote / Corporate Team | June 2025 – August 2025

- Supported phishing simulation campaigns in KnowBe4 by designing realistic HTML/CSS email templates for 3,000+ employees across U.S. lodge and corporate environments.
- Analyzed campaign results to identify high-risk users, report trends, and support targeted retraining plans.
- Developed custom Rapid7 InsightIDR detection alerts for unauthorized password storage, excessive MFA failures, and repeated VPN login attempts.
- Configured and deployed IdP-initiated SSO for business applications using Microsoft Entra ID, SAML, and application role mapping.
- Collaborated with application owners to troubleshoot access issues, validate SSO functionality, and document rollout steps.
- Delivered phishing-awareness guidance to six users identified through campaign results, reinforcing safe email handling and reporting practices.
- Participated in technical shadowing and Lunch & Learn sessions focused on Active Directory, corporate IT support, and multi-lodge network architecture.

Cybersecurity Assessment Project — Bradley Red Team

MIS 483: Advanced Ethical Hacking, Bradley University | Fall 2025

- Conducted OSINT and reconnaissance to support authorized cybersecurity and physical security assessments.
- Researched public domain records, archived web pages, exposed digital footprints, and other publicly available information to identify potential security gaps.
- Practiced ethical reconnaissance methods within a defined scope and organized findings for review.
- Participated in controlled social engineering and physical security testing to evaluate awareness, access control, and security procedures.
- Documented observations and translated findings into security improvement recommendations.
- Used the MITRE ATT&CK framework to connect findings to real-world adversary tactics, techniques, and procedures.

Education

Bachelor of Science in Cybersecurity

Bradley University | Graduated May 2026

Certifications

CompTIA Security+ (SY0-701) — Earned 2025

Technical Skills

- **Security Tools:** Rapid7 InsightIDR, KnowBe4, Wireshark, Nmap, Shodan, MITRE ATT&CK
- **Identity & Access:** Microsoft Entra ID, SAML SSO, MFA, Active Directory
- **Reconnaissance:** OSINT, WHOIS/DNS lookup, Google dorking, Wayback Machine
- **Technical:** HTML/CSS, Linux, networking fundamentals, documentation, security reporting
